2nd Exam	26/12/2024	30%
Final Exam	To be announced later	40%

Course Objectives	
1.	Develop a clear understanding of basic physical concepts in mechanics as an integral part of the student's overall education.
2.	Develop the ability to deal with the physical concepts quantitatively (numerically).
3.	Form a good foundation for follow-up courses in mathematics, physics and chemistry.
4.	Demonstrate the applications of modern methods to a variety of problems in physics.
5.	Develop the learning skills of the student in using computers as educational tools, problem solving and demonstration.
6.	Enhance the ability of the student for self-learning.

Teaching and Learning Methods	
1.	Lecturing.
2.	Special sessions for problem solving.
3.	Teaching tools:
a)	Simulations: Some simulation programs on PC that cover some of the topics in this course will be demonstrated throughout the course period.
b)	Overhead projector and data show.
