	. Reference	S:
Electronic Principles, Albert	P. Malvino. McGraw-Hill.	
	homas L. Floyd, Prentice Hall.	
Electric circuits, J. A. Edmi	nister, McGraw-Hill.	
Electronic Devices and circ	uit theory 9 th Edition, R. Boylestad and L. Nashelsky, Pearson Prentice Hall	

• Computer software: Electronic Workbench.

STUDENT LEARNING OUTCOMES MATRIX*

Core Curriculum Learning Outcomes	Program Learning Outcomes	Course Objectives	Course Student Learning Outcomes	Assessment Method
CC-LO-5 Think critically and creatively in a variety of methods in order to make decisions and	CHEM-LO-1: Apply critical thinking and demonstrate problem-solving skills in two or more of the major fields of chemistry.	1. Develop an understanding of the basic principles of the major branches of chemistry.	1. Identify and characterize chemical compounds	 Exams Quizzes "On-line' reading assignments homework assignments
solve problems.		2. Obtain a thorough foundation in the various fields of chemistry.	2. Explain natural phenomena using chemical concepts.	 Exams Quizzes "On-line' reading assignments
		3. Learn to solve chemical problems using basic mathematics.	 3.1 Carry out chemical calculations, including mass relations in chemical reactions, limiting reagent and reaction yield calculations, and calculations involving reactions taking place in solution. 3.2 Apply the ideal gas law in solving problems involving the gas phase. 3.3 Solve problems in chemical thermodynamics and calorimetry. 	 Exams Quizzes "On-line' reading assignments homework assignments
		4. Develop an understanding of chemical models and theories	 4.1 Describe the electronic structure of the elements using quantum numbers, orbital diagrams and electron configurations. 4.2 Predict the geometry of the electron pairs and the shape of molecules using VSEPR theory, predict bond polarity and molecular dipoles. 4.3 Describe the valence bond theory, predict the hybridization of atoms in molecules and describe bonding in molecules with single, double and triple bonds in terms of and π bonds, and delocalized molecular orbitals 4.4 Describe the principles of chemical bonding and write Lewis structures 	 Exams Quizzes "On-line' reading assignments homework assignments

ACADEMIC SUPPORT

It is The Hashemite University policy to provide educational opportunities that ensure fair, appropriate and reasonable accommodation to students who have disabilities that may affect their ability to participate in course activities or meet course requirements. Students with disabilities are encouraged to contact their Instructor to ensure that their individual needs are met. The University through its Special Need section will exert all efforts to accommodate for individual's needs.

Special Needs Section: Tel: Location: Email:

COURSE REGULATIONS

Participation

Class participation and attendance are important elements of every student's learning experience at The Hashemite University, and the student is expected to attend all classes. A

student <u>should not miss more than 15%</u> of the classes during a semester. *Those exceeding this limit of 15% will receive a failing grade regardless of their performance*. It is a student's responsibility to monitor the frequency of their own absences. **Attendance record begins on the first day of class irrespective of the period allotted to drop/add and late registration. It is a student's responsibility to sign-in; failure to do so will result in a non-attendance being recorded.**

In exceptional cases, the student, with the instructor's prior permission, could be exempted from attending a class provided that the number of such occasions does not exceed the limit allowed by the University. The instructor will determine the acceptability of an absence for being absent. A student who misses more than 25% of classes and has a valid excuse for being absent will be allowed to withdraw from the course.

Plagiarism

Plagiarism is considered a serious academic offence and can result in your work losing marks or being failed. HU expects its students to adopt and abide by the highest standards of conduct in their interaction with their professors, peers, and the wider University community. As such, a student is expected not to engage in behaviours that compromise his/her own integrity as well as that of the Hashemite University.

Plagiarism includes the following examples and it applies to all student assignments or submitted work:

- Use of the work, ideas, images or words of someone else without his/her permission or reference to them.
- Use of someone else's wording, name, phrase, sentence, paragraph or essay without using quotation marks.
- Misrepresentation of the sources that were used.

<u>The instructor has the right to fail the coursework or deduct marks where plagiarism is</u> <u>detected</u>

Late or Missed Assignments

In all cases of assessment, students who fails to attend an exam, class project or deliver a presentation on the scheduled date without prior permission, and/or are unable to provide a medical note, will automatically receive a fail grade for this part of the assessment.

- Submitting a term paper on time is a key part of the assessment process. Students who fail to submit their work by the deadline specified will automatically receive a 10% penalty. Assignments handed in more than 24 hours late will receive a further 10% penalty. Each subsequent 24 hours will result in a further 10% penalty.
- In cases where a student misses an assessment on account of a medical reason or with prior permission; in line with University regulations an incomplete grade for the specific assessment will be awarded and an alternative assessment or extension can be arranged.

Student Complaints Policy

Students at The Hashemite University have the right to pursue complaints related to faculty, staff, and other students. The nature of the complaints may be either academic or non-academic. For more information about the policy and processes related to this policy, you may refer to the students' handbook.

COURSE ASSESSMENT

Course Calendar and Assessment

Students will be graded through the following means of assessment and their final grade will be calculated from the forms of assessment as listed below with their grade weighting taken into account. The criteria for grading are listed at the end of the syllabus

Assessment	Grade Weighting	Deadline Assessment
e.g. Exam 1	e.g. 25%	Add date/time
e.g. Exam 2	e.g. 25%	Add date/time
e.g. Quizzes	e.g. 5%	
e.g. Homework	e.g. 5%	
e.g. Final Exam (3)	e.g. 40%	Add date/time

Description of Exams

Test questions will predominately come from material presented in the lectures. Semester exams will be conducted during the regularly scheduled lecture period. Exam will consist of a combination of multiple choice, short answer, match, true and false and/or descriptive questions.

Homework: Will be given for each chapter, while the chapter in progress you are supposed to work on them continuously and submit in next lecture when I finish the chapter.

You are also expected to work on in-chapter examples, self-tests and representative number of end of chapter problems. The answers of self-tests and end of chapter exercises are given at the end of the book.

Quizzes: Unannounced quizzes will be given during or/and at the end of each chapter based upon the previous lectures. It will enforce that you come prepared to the class.

No make-up exams, homework or quizzes will be given. Only documented absences will be considered as per HU guidelines.

Letter Grade	Description	Grade Points
A+	Excellent	4.00
А		3.75
A-		3.50
B+	Very Good	3.25
В		3.00
B-		2.75
C+	Good	2.50
С		2.25
C-		2.00
D+	Pass	1.75
D	Pass	1.50
F	Fail	0.00
I	Incomplete	-

Grades are not negotiable and are awarded according to the following criteria*:

* يمكن التعديل حسب طبيعة البرنامج (بكالوريوس/دراسات عليا)

WEEKLY LECTURE SCHEDULE AND CONTENT DISTRIBUTION

مثال على التوزيع : مساق الكيمياء العامة 101

"Lecture hours and weeks are approximate and may change as needed"

Note: For Chem 101 sections with 2 lecture periods per week (S/T, M/W or T/R), one lecture period covers 1.5 lecture hours (80 minutes). The course content specifies the sections in chapters 1-10 of the textbook that will be included in quizzes, homework and exams.

DC circuits		<u>Week 1-2</u>	6 <u>lecture hours</u>			
AC circuits		Week 3	3 <u>lecture hours</u>			
<u>Chapter 1</u>	Introduction to Semiconductors		<u>Week 4-5</u>	<u>6 lecture hours</u>		
<u>Chapter 2</u>	Diode Applications		<u>Week 6-7 6 le</u>	ecture hours		
<u>Chapter 3</u>	Special-Purpose Diodes		<u>Week 7-8</u>	<u>6 lecture hours</u>		
<u>Chapter 4</u>	Bipolar Junction Transistors		<u>Week 9-10</u>	<u>6 lecture hours</u>		
<u>Chapter 5</u>	Transistor Bias Circuits		<u>Week 11-12</u>	<u>6 lecture hours</u>		
<u>Chapter 6</u>	BJT Amplifiers		<u>Week 13-14</u>	6 <u>lecture hours</u>
