The Hashemite University

Deanship of Academic Development and International Outreach

عمادة التطوير الأكاديمي والتواصل الدولي

Syllabus*: Course Title and Code (110102311) First/Second Semester 2021 /2022

COURSE INFORMATION							
Course Name:	Electronics Lab	Course Code: 110102311					
Semester:	2 nd	Section: 1					
Department:	Department of Physics	Core Curriculum: B. Sc. of Science in					
Faculty: Faculty of Science		Physics					
Day(s) and Time(s Classroom:	s): Wednesday: 8:00-11:00	Credit Hours: 1 Prerequisites:					

COURSE DESCRIPTION

The laboratory gives the student the opportunity to experiment and verify the physical concepts that studied in Electronics Lab, such as, RC/RLC circuits, Diode characteristic and its applications

DELIVERY METHODS

The course will be delivered through a combination of active learning strategies. These will include:

- Conducting the experiment in the laboratory, obtaining results, analyzing them, and then discussing these results
- Collaborative learning through small groups acting in an interdisciplinary context.
- Relevant films and documentaries
- Video lectures
- E-learning resources: e-reading assignments and practice quizzes through YouTube and Microsoft Team

FACULTY INFORMATION

Name	Anas Yousef Alreyahi			
Academic Title:	Teacher			
Office Location:	Physics 104			
Telephone Number:				
Email Address:	anasy@hu.edu.jo			
Office Hours:	Sunday 12:00 – 1:00			
	Monday 11:30 – 12:30			
	Please send an e-mail (anasy@hu.edu.jo) to meet at any			
	other time.			

REFERENCES AND LEARNING RESOURCES

Required Textbook: Laboratory experiments for electronics courses, 1993. All

compulsory weekly readings are available electronically on

YouTube.

Suggested Additional Resources: Floyd, electronic devices (Publisher: 2011) ISBN: 978-

0134414447

Serway, Physics for Scientists and Engineer (Publisher: 2014)

Useful Web Resources: http://www.uni-ac.com

STUDENT LEARNING OUTCOMES MATRIX*

Core Curriculum Learning Outcomes	Program Learning Outcomes	Course Objectives	Course Student Learning Outcomes	Assessment Method
CC-LO-5 Think critically and creatively in a variety of methods in order to make decisions and	PHY-LO-1: Apply critical thinking and demonstrate problem-solving skills in two or more of the major fields of Physics.	1. Develop an understanding of the basic principles of the major branches of Physics.	Identify the experiment basics concepts and equipment	 Exams Quizzes "On-line' reading assignments homework assignments
solve problems.		2. Obtain a thorough foundation in the various fields of Physics.	Explain natural phenomena using the physical concepts of the experiments.	ExamsQuizzes"On-line' reading assignments
		3. Learn to solve physical problems using basic mathematics.	3.1 Carry out physical calculations.3.2 Apply laws in solving problems.	 Exams Quizzes "On-line' reading assignments homework assignments
		4. Develop an understanding of physical models and theories	 4.1 Describe the experiments concepts by building circuits and analyzing the output. 4.2 Predict the behavior of other phenomena from the results of the experiment. 4.3 Describe the steps and strategy of the experiment 	 Exams Quizzes "On-line' reading assignments homework assignments
.CC-LO-4. Communicate competently with others using oral and written English skills	CHEM-LO-4: Use modern literature search methods to obtain information about Physics topics and write reports.	5. Obtain an understanding of the role of Physics in other disciplines, and its importance in society.	5. Acquire the ability to learn independently; articulate the importance of independent learning for future professional development	 "On-line" reading assignments Term project
CC-LO-6. Demonstrate competency in the use of research skills and various information sources.	CHEM-LO-6: Communicate results to chemists and non-chemists.	6. Acquire positive attitudes towards further studies in Physics and towards the application of Physics in other disciplines.	6. Develop a positive attitude towards Physics and its applications in society, and towards further study and lifelong learning.	Term project

CC-LO-7.		
Identify the		
general		
concepts of		
humanities and		
natural sciences		
in a manner		
that reveals		
their value in		
life.		

ACADEMIC SUPPORT

It is The Hashemite University policy to provide educational opportunities that ensure fair, appropriate and reasonable accommodation to students who have disabilities that may affect their ability to participate in course activities or meet course requirements. Students with disabilities are encouraged to contact their Instructor to ensure that their individual needs are met. The University through its Special Need section will exert all efforts to accommodate for individual's needs.

COURSE REGULATIONS

Participation

Class participation and attendance are important elements of every student's learning experience at The Hashemite University, and the student is expected to attend all classes. A student should not miss more than 15% of the classes during a semester. Those exceeding this limit of 15% will receive a failing grade regardless of their performance. It is a student's responsibility to monitor the frequency of their own absences. Attendance record begins on the first day of class irrespective of the period allotted to drop/add and late registration. It is a student's responsibility to sign-in; failure to do so will result in a non-attendance being recorded.

In exceptional cases, the student, with the instructor's prior permission, could be exempted from attending a class provided that the number of such occasions does not exceed the limit allowed by the University. The instructor will determine the acceptability of an absence for being absent. A student who misses more than 25% of classes and has a valid excuse for being absent will be allowed to withdraw from the course.

Plagiarism

Plagiarism is considered a serious academic offence and can result in your work losing marks or being failed. HU expects its students to adopt and abide by the highest standards of conduct in

their interaction with their professors, peers, and the wider University community. As such, a student is expected not to engage in behaviours that compromise his/her own integrity as well as that of the Hashemite University.

Plagiarism includes the following examples and it applies to all student assignments or submitted work:

- Use of the work, ideas, images or words of someone else without his/her permission or reference to them.
- Use of someone else's wording, name, phrase, sentence, paragraph or essay without using quotation marks.
- Misrepresentation of the sources that were used.

<u>The instructor has the right to fail the coursework or deduct marks where plagiarism is detected</u>

Late or Missed Assignments

In all cases of assessment, students who fails to attend an exam, class project or deliver a presentation on the scheduled date without prior permission, and/or are unable to provide a medical note, will automatically receive a fail grade for this part of the assessment.

- Submitting a term paper on time is a key part of the assessment process. Students who fail to submit their work by the deadline specified will automatically receive a 10% penalty.
 Assignments handed in more than 24 hours late will receive a further 10% penalty. Each subsequent 24 hours will result in a further 10% penalty.
- In cases where a student misses an assessment on account of a medical reason or with prior permission; in line with University regulations an incomplete grade for the specific assessment will be awarded and an alternative assessment or extension can be arranged.

Student Complaints Policy

Students at The Hashemite University have the right to pursue complaints related to faculty, staff, and other students. The nature of the complaints may be either academic or non-academic. For more information about the policy and processes related to this policy, you may refer to the students' handbook.

COURSE ASSESSMENT

Course Calendar and Assessment

Students will be graded through the following means of assessment and their final grade will be calculated from the forms of assessment as listed below with their grade weighting taken into account. The criteria for grading are listed at the end of the syllabus

Assessment	Grade Weighting	Deadline Assessment
Repots	30%	All-time of the semester
Midterm Exam	30	24-27/4/2022
Final Exam	40%	Later

Description of Exams

Test questions will predominately come from material presented in the lectures. Semester exams will be conducted during the regularly scheduled lecture period. Exam will consist of a combination of multiple choice, short answer, match, true and false and/or descriptive questions. **Homework:** Will be given for each experiment, while the experiment in progress you are supposed to work on them continuously and submit in next lecture when I finish the experiment. You are also expected to work on in-experiment examples, self-tests and representative number of end of experiment problems. The answers of self-tests and end of experiment exercises are given at the end of the book.

Quizzes: Unannounced quizzes will be given during or/and at the end of each experiment based upon the previous lectures. It will enforce that you come prepared to the class.

No make-up exams, homework or quizzes will be given. Only documented absences will be considered as per HU guidelines.

Grades are not negotiable and are awarded according to the following criteria*:

Letter Grade	Description	Grade Points
A+	Excellent	4.00
А		3.75
A-		3.50
B+	Very Good	3.25
В		3.00
B-		2.75

C+	Good	2.50
С		2.25
C-		2.00
D+	Pass	1.75
D	Pass	1.50
F	Fail	0.00
1	Incomplete	-

WEEKLY LECTURE SCHEDULE AND CONTENT DISTRIBUTION

"Lecture hours and weeks are approximate and may change as needed"

Experiment	Week#
Introduction	1
RC circuits	2
RLC circuits	3
Diode and Transistor characteristic	4
Rectification and filtering	5
Zener diode	6
Diode Clipper and Clamping	7
Transistor Biasing	8
Transistor Amplifiers	9
Operational Amplifier	10

ASSESSMENT RUBRICS
