Faculty of Engineering
Civil Engineering Program
Course Syllabus

Course Title: Traffic Engineering 3 (3,0) **Course Number:** 110401468

Designation: Compulsory **Prerequisite(s):** 110401367
Instructor: Dr. Randa Oqab Mujalli **Instructor's e-mail:-** randao@hu.edu.jo
Office Hour

Course Description (catalog): Traffic Flow Theory; Traffic Studies (volume, speed, travel time, and parking); Traffic control devices; Introduction to traffic signal timing, Parking facilities; Traffic safety studies.

Textbook(s) and/or Other Supplementary Materials:

- Fred L. Mannering, Scott S. Washburn, Walter P. Kilareski, **Principles of Highway Engineering and Traffic Analysis**, Fourth Edition, John Wiley and Sons Inc., 2009.

Other Supplementary Materials:

- Highway Capacity Manual (HCM), Special Report 209, TRB, 2000.
- W. R. McShane, R. P. Roess, E. S. Prassas, Traffic Engineering, Third Edition, Pearson Prentice Hall, 2004.
- Traffic & Highway Engineering by Nicholas Garber and Lester Hoel, Fourth Edition, Brooks/Cole.

Major Topics Covered:

Topics	No. of Weeks	Contact hours*
1. Introduction to traffic engineering	1/3	1
2. Review of driver-vehicle-roadway characteristics	1	3
3. Traffic flow theory and models	2 1/3	7
4. Traffic Engineering Studies	2	6
5. Intersections, design, and control	4	12
6. Two way two lanes LOS	1 1/3	4
7. Multi-lane highways LOS	1 1/3	4
8. Freeways (basic segments) LOS	1 1/3	4
9. Traffic Safety	1 1/3	4
Total	15	45

*Contact hours include lectures, quizzes and exams

Specific Outcomes of Instruction (Course Learning Outcomes, CLO):

After completing the course, the student will be able to:

CLO1: Analyze the operational characteristics of un-signalized intersections, analyze and plan the timing of traffic signals, analyze level of service of Two-way highways, Multi-Lanes highways, and Basic freeway segment. (1)

CLO2: An ability to identify, formulate, and solve engineering problems dealing with volume, speed, delay studies and traffic safety of existing roadways (1)

The Hashemite University
Faculty of Engineering
Civil Engineering Program
Course Syllabus

CLO3: knowledge of contemporary issues such as traffic studies observation equipment and safety studies analysis techniques (7)

Student Outcomes (SO) Addressed by the Course:

#	Outcome Description	Contribution
General Engineering Student Outcomes		
1	an ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics	M
2	an ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors	
3	an ability to communicate effectively with a range of audiences	
4	an ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts	
5	an ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives	
6	an ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions	
7	an ability to acquire and apply new knowledge as needed, using appropriate learning strategies.	M
H=High, M= Medium, L=Low		

Grading Plan:

First exam	25	Points
Midterm exam	25	Points
Quizzes	10	Points
Final exam	40	Points

General Notes:

- The maximum allowed number of absentees from the course is **six** classes.
- Exceeding these limits will lead to prevention from attending the final exam.
- **No MAKE-UP EXAMS.**

Prepared by: Dr. Randa Oqab Mujalli **Date:** February 26, 2023
