Course information	
<b>Course Title</b>	Radiological Imaging Procedures (2)
<b>Course Code</b>	110508322
<b>Prerequisites</b>	110508321 or concurrent
<b>Credit Hours</b>	3 (2 Theory + 3 Lab hours)
Course Description	
This course is designed to provide the student with an opportunity to gain knowledge on how to perform different radiographic procedures of the skull, sinuses, spines, lumbosacral, sacrum, coccyx, breast mammography, and tomography. Independent decision making regarding trauma radiography is also included.	
Course Objectives	
By the end of this course, the student is expected to:	
By the end of the course the student will be able to perform the following radiographic procedures	
1. Radiographic positioning of the cranial and facial bones 2. Radiographic positioning of the teeth 3. Radiographic positioning of the paranasal sinuses 4. Radiographic positioning of the vertebral column (cervical, thoracic, lumbar, sacral, and coccyx) 5. Radiographic positioning of the chest 6. Radiographic positioning of the breast (mammography) 7. Tomography demonstration
