| Course Description | <p>This course provide theoretical and practical principles and guidelines needed to develop high quality interface designs–ones that users can understand, predict, and control. It covers theoretical foundations, and design processes such as expert reviews and usability testing. Numerous examples of direct manipulation, menu selection, and form fill-in give readers an understanding of excellence in design. In addition, the profound changes brought by user-generated content of text, photo, music, and video and the raised expectations for compelling user experiences.</p> |

| <p>1. Designing the User Interface: Strategies for Effective Human-Computer Interaction (6th Edition), Ben Shneiderman, Catherine Plaisant, Maxine Cohen, Steven Jacobs, Addison Wesley, 2017.</p> |

| Course Learning Outcomes CLOs | |
|--|--|
| 1. Explain the usability of interactive systems (a) | |
| 2. Discuss how to design, implement and evaluate user interface (b, i) | |
| 3. Compare different interaction styles used in user interface design (c) | |
| 4. Identify issues that typically exist in a user interface (b) | |
| 5. Apply appropriate interaction devices for user interface community (c, i) | |
| Addressed Student Learning Outcomes (SLOs) | |
| a, b, c and i | |
