## Syllabus Diagnostic Ultrasound (140508273)Second Semester 2021 /2022

|                          |  | ORMATION   |  |  |  |  |
|--------------------------|--|--|--|--|--|--|
| Course Name:             | Diagnostic Ultrasound                        | Course Code: 140508111                                       |  |  |  |  |
| Semester:                | First  | Section:   |  |  |  |  |
| Department:              | Department of Medical Imaging                | Medical ultrasound Imaging Applications                      |  |  |  |  |
| Faculty:                 | Applied Medical Sciences                     | Core Curriculum:   |  |  |  |  |
|                          |  | Radiological and Medical Imaging                             |  |  |  |  |
| Day(s) and Time(s)       | : Sunday: 11:00-12:00                        | Credit Hours: 3  |  |  |  |  |
|                          | Tuesday: 11:00-12:00                         | Prerequisites: 140508111                                     |  |  |  |  |
|                          | Thursday (online): 11:00-12:00               |  |  |  |  |  |
| Classroom: Nui           | rsing 202                                    |  |  |  |  |  |
|                          | COURSE DE                                    | SCRIPTION  |  |  |  |  |
| This course introduce    | the student to comprehensive covera          | ge of the physical principles of Diagnostic Ultrasound       |  |  |  |  |
| (US) and its clinical ap | pplications, the theoretical foundations     | s necessary for the clinical practice of US scanning and     |  |  |  |  |
| understanding of 3D a    | anatomical images as they related.           | cod. The course starts with introducing the basics           |  |  |  |  |
| The course will be       | delivered through a combination of active le | earning strategies. These will include:                      |  |  |  |  |
| PowerPoint le            | ctures and active classroom based discussion | n.   |  |  |  |  |
| Collaborative            | earning through small groups acting in an in | terdisciplinary context.                                     |  |  |  |  |
| Relevant films           | and documentaries.                           |  |  |  |  |  |
| Video lectures           |  |  |  |  |  |  |
| E-learning reserved      | ources: e-reading assignments and practice o | quizzes through Model and Microsoft Team.                    |  |  |  |  |

### **Required Textbook:**

There is no required textbook for purchase. All compulsory weekly readings are available electronically on Microsoft Teams and Teaching files" on Facebook group.

#### Suggested textbook for reading:

Diagnostic Ultrasound, P.Hoskins, K. Martin and A. Thrush, CAMBRIDGE – UK, 2010, 2<sup>nd</sup> Ed.

Diagnostic Ultrasound, Stewart C. Bushong, 1999, 1st Ed.

Ultrasound Physics and Instrumentional, W. R. Hedrick, D. L. Hykes, and D. E. Starchman, Lippincott Williams and Wilkins, 1995, 3rd Ed.

## **STUDENT LEARNING OUTCOMES MATRIX\***

#### **ACADEMIC SUPPORT**

It is The Hashemite University policy to provide educational opportunities that ensure fair, appropriate and reasonable accommodation to students who have disabilities that may affect their ability to participate in course activities or meet course requirements. Students with disabilities are encouraged to contact their Instructor to ensure that their individual needs are met. The University through its Special Need section will exert all efforts to accommodate for individual's needs.

#### **COURSE REGULATIONS**

#### Participation

Class participation and attendance are important elements of every student's learning experience at The Hashemite University, and the student is expected to attend all classes. A student <u>should not miss more than 15%</u> of the classes during a semester. *Those exceeding this limit of 15% will receive a failing grade regardless of their performance*. It is a student's responsibility to monitor the frequency of their own absences. **Attendance record begins on the first day of class irrespective of the period allotted to drop/add and late registration**. It is a student's responsibility to sign-in; failure to do so will result in a non-attendance being recorded.

In exceptional cases, the student, with the instructor's prior permission, could be exempted from attending a class provided that the number of such occasions does not exceed the limit allowed by the University. The instructor will determine the acceptability of an absence for being absent. A student who misses more than 25% of classes and has a valid excuse for being absent will be allowed to withdraw from the course.

#### Plagiarism

Plagiarism is considered a serious academic offence and can result in your work losing marks or being failed. HU expects its students to adopt and abide by the highest standards of conduct in their interaction with their professors, peers, and the wider University community. As such, a student is expected not to engage in behaviors that compromise his/her own integrity as well as that of the Hashemite University.

Plagiarism includes the following examples and it applies to all student assignments or submitted work:

- Use of the work, ideas, images or words of someone else without his/her permission or reference to them.
- Use of someone else's wording, name, phrase, sentence, paragraph or essay without using quotation marks.
- Misrepresentation of the sources that were used.

#### The instructor has the right to fail the coursework or deduct marks where plagiarism is detected

#### Late or Missed Assignments

In all cases of assessment, students who fails to attend an exam, class project or deliver a presentation on the scheduled date without prior permission, and/or are unable to provide a medical note, will automatically receive a fail grade for this part of the assessment.

• Submitting a term paper on time is a key part of the assessment process. Students who fail to submit their work by the deadline specified will automatically receive a 10% penalty. Assignments handed in more than 24 hours late will receive a further 10% penalty. Each subsequent 24 hours will result in a further 10% penalty.

 In cases where a student misses an assessment on account of a medical reason or with prior permission; in line with University regulations an incomplete grade for the specific assessment will be awarded and an alternative assessment or extension can be arranged.

#### Student Complaints Policy

Students at The Hashemite University have the right to pursue complaints related to faculty, staff, and other students. The nature of the complaints may be either academic or non-academic. For more information about the policy and processes related to this policy, you may refer to the students' handbook.

#### **COURSE ASSESSMENT**

#### **Course Calendar and Assessment**

Students will be graded through the following means of assessment and their final grade will be calculated from the forms of assessment as listed below with their grade weighting taken into account. The criteria for grading are listed at the end of the syllabus

| Assessment | Grade Weighting | Deadline<br>Assessment                    |
|------------|-----------------|---|
| Exam 1     | 30%             | 10/4/2022<br>12:00-1:00                   |
| Exam 2     | 30%             | 15/5/2022<br>12:00-1:00                   |
| Final Exam | 40%             | To be arranged by the registration office |

#### **Description of Exams**

Test questions will predominately come from material presented in the lectures. Semester exams will be conducted during the regularly scheduled lecture period. Exam will consist of a combination of multiple choice, short answer, match, true and false and/or descriptive questions.

#### Homework:

Will be given for each chapter, while the chapter in progress you are supposed to work on them continuously and submit in next lecture when I finish the chapter.

You are also expected to work on in-chapter examples, self-tests and representative number of end of chapter problems. The answers of self-tests and end of chapter exercises are given at the end of the book.

#### Quizzes:

Unannounced quizzes will be given during or/and at the end of each chapter based upon the previous lectures. It will enforce that you come prepared to the class.

No make-up exams, homework or quizzes will be given. Only documented absences will be considered as per HU guidelines.

Grades are not negotiable and are awarded according to the following criteria\*:

| Letter Grade | Description | Grade Points |
|--------------|-------------|--------------|
| A+           | Excellent   | 4.00         |
| А            |             | 3.75         |
| A-           |             | 3.50         |
| B+           | Very Good   | 3.25         |
| В            |             | 3.00         |
| В-           |             | 2.75         |
| C+           | Good        | 2.50         |
| С            |             | 2.25         |
| C-           |             | 2.00         |

| D+ | Pass       | 1.75 |
|----|------------|------|
| D  | Pass       | 1.50 |
| F  | Fail       | 0.00 |
| I  | Incomplete | -    |

# WEEKLY LECTURE SCHEDULE AND CONTENT DISTRIBUTION "Lecture hours and weeks are approximate and may change as needed"

| Part O | ne 1 Introduction, History, and Characteristics     | s of sound and Ultrasound (U | <b>S</b> )       |
|--------|---|------------------------------|------------------|
|        | Week 1- 2   | 18 lecture hours             |                  |
| 1.1    | Introduction and history of US                      |                              |                  |
| 1.2    | Fundamental of waves                                |                              |                  |
| 1.3    | Nature of sound                                     |                              |                  |
| 1.4    | Speed of sound, frequency, wavelength, pressure, a  | amplitude, and intensity.    |                  |
| Part T | wo: Interaction of ultrasound with tissues          | Week 3                       | 12 lecture hours |
| 2.1    | Reflection  |                              |                  |
| 2.2    | Refraction  |                              |                  |
| 2.3    | Diffraction   |                              |                  |
| 2.4    | Wave interference                                   |                              |                  |
| 2.5    | Attenuation   |                              |                  |
| 2.6    | Wave Motion   |                              |                  |
| 2.7    | Acoustic impedance                                  |                              |                  |
| Part T | hree Transducers and beam-forming                   | Week 4                       | 12 lecture hours |
| 3.1    | Common features of all transducers and transducer   | elements                     |                  |
| 3.2    | Linear- and curvilinear-array transducers (beam-ste | pping arrays)                |                  |
| 3.3    | Phased-array transducers (beam-steering arrays)     |                              |                  |
| 3.4    | Hybrid beam-stepping/beam-steering transducers      |                              |                  |
| 3.5    | 3D/4D transducers                                   |                              |                  |
| Part F | our: Beam Properties                                | Week 5-7                     |                  |
| 4.1    | Near field  |                              |                  |
| 4.2    | Far field   |                              |                  |
| 4.3    | Side lobe   |                              |                  |
| 4.4    | Great lobe  |                              |                  |

| Part Five:         | Data acquisition                   | Week 8-10  |
|--------------------|------------------------------------|--|
| 5.1 beam former    |                                    |  |
| 5.2 Transmitter    |                                    |  |
| 5.3 Amplifier      |                                    |  |
| 5.4 Receiver       |                                    |  |
| 5.6 Compensation   |                                    |  |
| 5.7 Compression    |                                    |  |
| Part Six:          | Ultrasound Modes                   | Week 11  |
| 6.1 A-mode         |                                    |  |
| 6.2 B-mode         |                                    |  |
| 6.3 C-mode         |                                    |  |
| 6.4 D-mode         |                                    |  |
| 6.5 <i>M</i> -mode |                                    |  |
