<b>Coordinator's Name:</b>	Prof. Ahmad Khasawneh
----------------------------	-----------------------

<b>Course Description</b>	Presents introduction to the principles of Information Systems (IS) and their foundational technologies: hardware, software, databases, and networks (the Internet, Intranets, and Extranets). It identifies steps of the systems development process, types of roles, functions, competitive advantages, and careers in IS. It describes how IS are used in organization to improve its quality, revenue, service and competitive advantage. It includes topics for understanding business information systems including Mobile Commerce and Enterprise Systems, Decision Support Systems, and Specialized Information Systems.
---------------------------	--

<b>a) Textbook(s):</b>
