Email:	Zyad@hu.edu.jo
Module description	This course introduces an overview of banks structure and banks financial services. It also deals with banks' financial statements in addition to banks' off-balance sheet activities. We then turn to bank's performance evaluation and risk measurements. The asset-liability management (ALM) strategies then discussed. Risk management using financial futures, options, swaps, in addition to risk management using asset-backed securities, loan sales, credit standbys, and credit derivatives. The Investment function of banks is no less important therefore the course discusses the liquidity and reserve management, managing and pricing deposit services. Finally it discusses the management of banks capital.
Aims	<b>COURSE OBJECTIVES:</b> <ol style="list-style-type: none"> <li>1. To equip the student with the principles he or she needs to make sense out of the conflicting and contradictory discussions of financial economic conditions and policies in newspapers and news magazines.</li> <li>2.
