

## (Syllabus: General Microbiology (111501204

### First Semester 2024/2025

COURSE INFORMATION	
<p><b>Course Name:</b> General Microbiology  <b>Semester:</b> First semester  <b>Department:</b> Department of Microbiology, Pathology and Forensic Medicine.  <b>Faculty:</b> Medicine</p>	<p><b>Course Code:</b> 111501204  <b>Section:</b> All sections  <b>Core Curriculum:</b> MD</p>
<p><b>Day(s) and Time(s):</b>  <b>Theory:</b> Sunday: Group (A), 10:30 am –11:30 am  Group (B), 12:30 pm – 1:30 pm  Tuesday: Group (B), 9:00 am –10:30 am  Group (A), 12:30 pm – 2:00 pm  <b>Lab:</b> Sunday &amp; Tuesday: 1:30 pm – 3:30 pm  <b>Classroom:</b>  <b>Theoretical lectures:</b> Faculty of Medicine auditorium and Allied Medical Sciences auditorium.  <b>Practical sessions:</b> lab of microbiology.</p>	<p><b>Credit Hours:</b> 2.5 Theory  0.5 Lab  <b>Prerequisites:</b> None</p>
COURSE DESCRIPTION	
<p>This course is an introductory course intended to introduce undergraduate medical students to a variety of subjects in medical microbiology. The course will provide an introduction to the basic principles and application relevance of clinical disease for students who are in preparation for physicians. The content of this rigorous course covers all biology of bacteria, viruses, fungi, parasites, and other pathogens related with infectious diseases in humans.</p> <p>The course provides the second year medical student with the basic knowledge as well as the practical skills in medical microbiology. In addition to the introduction to the basic biology of micro-organisms of medical importance, interaction of these micro-organisms with humans is studied as related to the pathogenesis and management and control of infectious diseases.</p> <p>To achieve the maximum benefit of this course and to develop both informatic and diagnostic skills in microbiology including the practical application and interpretation of laboratory tests for the diagnosis of infectious diseases; hard work and appropriate methods of learning are the keys for that target.</p>	
DELIVERY METHODS	
<p>:The course will be delivered through a combination of active learning strategies. These will include</p> <ul style="list-style-type: none"> <li>● PowerPoint lectures and active classroom based discussion</li> <li>● Relevant films and documentaries</li> <li>● Video lectures</li> <li>● E-learning resources: e-reading assignments and practice quizzes through Microsoft Team</li> </ul>	

**Course Coordinator**

<b>Name</b>	<b>Hala Tabl</b>
<b>Academic Title:</b>	<b>Professor of Microbiology and Immunology</b>
<b>Office Location:</b>	<b>Faculty of Medicine, Hashemite University</b>
<b>Telephone Number:</b>	<b>Ground floor, Office number: 1041</b>
<b>Email Address:</b>	<a href="mailto:halaa_mo@hu.edu.jo">halaa_mo@hu.edu.jo</a> , <a href="mailto:halaa_mo@staff.hu.edu.jo">halaa_mo@staff.hu.edu.jo</a> ,
<b>Office Hours:</b>	<b>Sunday: 11-12</b> <b>Tuesday: 11-1</b>

**STUDENT LEARNING OUTCOMES MATRIX\***

Program Learning Outcomes	Course Objectives	Course Student Learning Outcomes	Assessment Method
---------------------------	-------------------	----------------------------------	-------------------

	1. Introduction: Understand the concept of medical microbiology.	1.1 Introduction to Microbiology	● Exams
	2. Understand the bacterial cell structure, growth, nutrition and genetics	2.1 Bacterial Cell Structure 2.2 Bacterial Nutrition and Growth 2.3 Bacterial Genetics	● Exams
	3. Describe the various methods of sterilization and disinfection	3.1 Control of Microorganisms: Sterilization and Disinfection	● Exams
	4. Understand the various types of antimicrobial chemotherapy origin and types of microbial resistance	4.1 Antimicrobial Drugs & Antimicrobial Resistance	● Exams
	5. Understand different methods of diagnosis of microbial infections and understand principles of different methods of serological diagnosis	5.1 Diagnosis of microbial growth 5.2 Serological diagnosis	● Exam
	6. Bacteriology: Differentiate between Gram positive and Gram negative bacteria as well as mycobacteria, rickettsia, chlamydia, mycoplasma and spirochaetes	6.1 Gram-Positive Cocci 6.2 Gram-Negative Cocci 6.3 Gram-Positive Bacilli 6.4 Enterobacteriaceae 6.5 Haemophilus, Bordetella, Pseudomonads, Acinetobacter and other Gram-Neg. Bacilli 6.6 Vibrios, Campylobacter and Helicobacter 6.7 Brucella and Yersinia 6.8 Mycobacteria 6.9 Rickettsia, Chlamydia and Mycoplasma 6.10 Spirochaetes, Bacteroides and non-sporing Anaerobes	● Exams
	7. Mycology: Understand the importance, morphological forms and reproduction of fungi Understand the difference between major superficial, subcutaneous and systemic fungi.	7.1 General mycology	● Exams
	8. Parasitology: Understand the basic characteristics and classifications of parasites. Understand the general morphology life cycle and clinical importance of different protozoa and helminths	8.1 Introduction to Parasitology 8.2 Protozoa & Helminths	● Exams
	9. Virology: Understand the viral structure, replication, and genetics Understand the pathogenesis and immunity to viral infections Describe the various diagnostic methods of viral infections Understand the concept anti-viral chemotherapy Differentiate between DNA and RNA viruses	9.1 Introduction to Virology 9.2 Viral Structure 9.3 Viral Replication 9.4 Viral Genetics 9.5 Pathogenesis to Viral Infections 9.6 Immunity to viruses 9.7 Diagnosis of Viral Infections 9.8 Anti-Viral Agents 9.9 DNA Viruses & RNA Viruses	● Exams
	10. Practical Microbiology: ● Become proficient in laboratory	10.1 Laboratory orientation, instruments & equipment.	● Exams

	<p>skills and safety protocols.</p> <ul style="list-style-type: none"> <li>• Learn to follow experimental procedures.</li> <li>• Apply the scientific method: formulate answerable questions/hypotheses, predict expected results, make careful observations, collect and analyze/interpret data, and draw appropriate conclusions.</li> <li>• To show proficiency in scientific writing (laboratory reports)</li> <li>• Embark in active learning opportunities in the laboratory.</li> <li>• Demonstrate good lab student and the ability to work with others</li> </ul>	<p>10.2 Laboratory Safety 10.3 Cultivation and isolation of bacteria 10.4 Culture media and colonial morphology 10.5 Gram stain and Ziehl-Neelsen stain 10.6 Biochemical tests 10.7 Serological tests 10.8 Parasitology Lab 10.9 Antibiotic susceptibility tests</p>

## ACADEMIC SUPPORT

It is The Hashemite University policy to provide educational opportunities that ensure fair, appropriate and reasonable accommodation to students who have disabilities that may affect their ability to participate in course activities or meet course requirements. Students with disabilities are encouraged to contact their Instructor to ensure that their individual needs are met. The University through its Special Need section will exert all efforts to accommodate for individual's needs.

**Special Needs Section: Deanship of student's affairs**

## COURSE REGULATIONS

### General rules:

- **Missed exams:** Students who are absent in any exam are allowed to sit a make-up exam after presenting an approved sick leave or any accepted certificate of absence to the assistant of the faculty dean within 72 hours. The Course Coordinator will determine the time of the exam make-up session. Also, according to the Curriculum Committee and the University regulations, the student will sit an essay examination. All examinations must be made up within one week of returning to class. Those absents who do not present a clue will be given a zero mark.
- **Absence:** Professionalism is a major component of our medical curriculum. We believe students should conduct themselves appropriately in the various educational activities of the curriculum. This conduct includes coming to educational activities on-time. The faculty should also demonstrate professionalism, by starting and ending all scheduled educational activities on time and providing a course schedule with clearly explained course policies in the course syllabus. Any changes in the schedule should be given to the students in a timely manner.
- Students will be accountable and personally responsible for attending all educational activities (lectures, labs, examinations, etc.). Unexcused absences reflect negatively on the goals and objectives of the medical curriculum and demonstrate unprofessional behavior by the respective student.

- Students are expected to attend all scheduled activities. Students are expected to be on time. Being on time is defined as being ready to start at the assigned time. If a student has an emergency that prevents her/him from attending a scheduled activity, s/he has to notify the Course Coordinator and present an approved sick leave or any accepted certificate of absence by the faculty dean assistant.
- Attendance is mandatory. Students are expected to attend all scheduled activities. Students are expected to be on time. Being on time is defined as being ready to start at the assigned time. If a student has an emergency that prevents her/him from attending a scheduled activity, s/he has to notify the Course Coordinator and present an approved sick leave or any accepted certificate of absence by the faculty dean assistant. Students who exceed the 15% limit without a medical or emergency excuse acceptable to and approved by the Dean of the faculty shall not be allowed to take the final examination and shall receive a mark of zero for the course. If the excuse is approved by the Dean, the student shall be considered to have withdrawn from the course.
- **Cheating:** Cheating will not be tolerated. Each individual student is responsible for his behavior and is expected to maintain standards of academic honesty and professionalism. If any instance of academic dishonesty (cheating, plagiarism, etc.) is discovered by a coordinator or an instructor, it is his or her responsibility to take appropriate action. Such action may include giving a failing grade to the student in the course and/or referring the student for Judicial Procedures Office review and possible disciplinary action, which may include disciplinary suspension or dismissal from the College.

#### **Classroom Protocol:**

- Professionalism is a major component of our medical curriculum. We believe students should conduct themselves appropriately in the various educational activities of the curriculum. This conduct includes coming to educational activities on-time. The faculty should also demonstrate professionalism, by starting and ending all scheduled educational activities on time and providing a course schedule with clearly explained course policies in the course syllabus. Any changes in the schedule should be given to the students in a timely manner.
- Students respond politely to faculty, staff, and student colleagues, exemplifying their maturity and empathy. Students agree to abide by appropriate biosafety practices when required.
- All students are expected to be quiet in their seats in the lecture theatre before the start of the lecture. Engagement in class discussions is encouraged without side chatting. Cell phones are not allowed to be used during lectures and exams unless prior approval has been taken from the course instructor.

#### **Laboratory Safety**

- Lab coats and safety glasses must be worn at all times while in the laboratory. Regular prescription glasses are generally not made with safety glass and thus safety glasses must be worn over the top of these glasses at all times. Safety glass checks will be made throughout the semester.
- Only the materials pertinent to lab work, such as a lab manual/notebook, and other lab materials, should be brought to your workspace. All other items such as coats, books, and bags should be stored on the shelves provided for this purpose.
- No eating, drinking or smoking in the lab.
- Know lab safety procedures and the location of the first aid kit, eyewash, and fire extinguisher.

- All culture material should be handled as if it were potentially harmful.
- Be very careful with Bunsen burners. Avoid wearing loose clothing that may be exposed beneath a lab coat and thus provide potential fuel for the flame. Burners should be turned off when not in use.
- Long hair must be tied back at all times while in the laboratory. Long pants and closed toed shoes are suggested.
- The chemical compounds used to stain bacteria can be irritating to the skin. The use of gloves when performing staining procedures will help minimize exposure.
- Dispose of materials as instructed. Do not carelessly throw materials in wastebaskets or sinks; biohazard waste containers are available.
- Report any accident or injury immediately to the laboratory instructor so that prompt action can be taken.
- After each lab, WASH your hands before leaving the laboratory.
- The surfaces of lab benches are washed with disinfectant and rinsed with water twice a day by the teaching assistants and instructor.
- If you have any allergies, chemical sensitivities or if you are pregnant or think you may become pregnant, please identify yourself to the instructor. If, for any of these reasons (or others), you believe that your safety is compromised in the lab, we will make alternative arrangements for completion of this portion of the course.

### **Student Complaints Policy**

Students at The Hashemite University have the right to pursue complaints related to faculty, staff, and other students. The nature of the complaints may be either academic or non-academic. For more information about the policy and processes related to this policy, you may refer to the students' handbook.

## COURSE ASSESSMENT

### ***Course Calendar and Assessment***

Students will be graded through the following means of assessment and their final grade will be calculated from the forms of assessment as listed below with their grade weighting taken into account. The criteria for grading are listed at the end of the syllabus

Assessment	Form	Grade Weighting	Deadline Assessment
------------	------	-----------------	---------------------

Exam 1 (mid)	M CQs	40%	1/12/2024
Exam 2 (Practical)	M CQs	20%	9/1/2025
Exam 3 (Final)	M CQs	40%	/1/2025

### Description of Exams

Test questions will predominately come from material presented in the lectures. Semester exams will be conducted during the regularly scheduled lecture period. Exam will consist of multiple choice.

No make-up exams, homework or quizzes will be given. Only documented absences will be considered as per HU guidelines.

Grades are not negotiable and are awarded according to the following criteria\*:

<b>L etter Grade</b>	<b>Descrip tion</b>	<b>G rade Points</b>
A +	Excellent	4. 00
A		3. 75
A-		3. 50
B +	Very Good	3. 25
B		3. 00
B-		2. 75
C +	Good	2. 50
C		2. 25
C-		2. 00
D +	Pass	1. 75
D	Pass	1. 50
F	Fail	0. 00
I	Incompl ete	-

**Theoretical Lectures**

Week number	Day	Date	Lecture topic	Lecturer
1	Sunday Tuesday	6/10 8/10	Introduction and History of Microbiology Bacterial Cell Structure	Dr. Mohammad Dr. Mohammad
2	Sunday Tuesday	13/10 15/10	Bacterial Growth and Nutrition Bacterial genetics	Dr. Mohammad Dr. Mohammad
3	Sunday Tuesday	20/10 22/10	Control and Sterilization of Microorganisms Diagnosis of microbial growth	Dr. Mohammad Dr. Mohammad
4	Sunday Tuesday	27/10 29/10	Antimicrobial resistance (AMR) Serological diagnosis	Dr. Mohammad Dr. Hala
5	Sunday Tuesday	3/11 5/11	Gram-Positive Cocci Gram-Negative Cocci	Dr. Hafez Dr. Hafez
6	Sunday Tuesday	10/11 12/11	Gram-Negative Rods (Enterobacteriace) Haemophilus, Bordetella, and Pseudomonads	Dr. Hafez Dr. Hafez
7	Sunday Tuesday	17/11 19/11	Gram-Positive Bacilli General Mycology	Dr. Hafez Dr. Hafez
8	Sunday Tuesday	24/11 26/11	XXXXXXXXXXXXXXXXXXXXXXXXXXXX Introduction to Parasitology	Dr. Hala
9	Sunday Tuesday	1/12 3/12	<b>Microbiology Mid Exam</b> Protozoa & Helminthes	Dr. Hala
10	Sunday Tuesday	8/12 10/12	Introduction to Virology Viral Structure	Dr. Mohammad Dr. Mohammad
11	Sunday Tuesday	15/12 17/12	Viral Replication Viral Pathogenesis	Dr. Mohammad Dr. Mohammad
12	Sunday Tuesday	22/12 24/12	Viral Immunology Viral Genetics	Dr. Mohammad Dr. Mohammad
13	Sunday Tuesday	29/12 31/12	Diagnosis of Viral Infections Anti-Viral agents	Dr. Mohammad Dr. Mohammad
14	Sunday Tuesday	5/1 7/1	DNA Viruses & RNA viruses Revision	Dr. Mohammad
15	Sunday Tuesday	12/1 14/1	Revision Revision	
16			<b>Final Exam period</b>	

**Practical Laboratory sessions:**

Lab	Topic	Day	Date	group	Instructor
-----	-------	-----	------	-------	------------

1.	Introduction and safety	Sunday Tuesday	13/10 15/10	B A	Dr. Hafez Dr. Hafez
2.	Culture media & Colony morphology	Sunday Tuesday	20/10 22/10	B A	Dr. Hafez Dr. Hafez
3.	Serological tests	Sunday Tuesday	3/11 5/11	B A	Dr. Hala Dr. Hala
4.	Gram stain	Sunday Tuesday	10/11 12/11	B A	Dr. Mohammad Dr. Mohammad
5.	Biochemical tests	Sunday Tuesday	17/11 19/11	B A	Dr. Mohammad Dr. Mohammad
6.	Parasitology	Sunday Tuesday	1/12 3/12	B A	Dr. Hala Dr. Hala
