<b>Course Title:</b>	<b>Accounting Theory</b>	<b>1802021442</b>
<b>Instructor:</b>	<b>Dr. Fadi Shiyyab</b>	
<b>E-mail:</b>	<b>Fadi_shiyyab@hu.edu.jo</b>	
<b>Term:</b>	<b>2nd Term 2018/2019</b>	

**Course Description:**

The course provides students with the theoretical background they need to keep up with convergence issues and succeed in today's increasingly global economy. This course explores some of the theoretical issues that underlie the discipline of financial accounting and some of the practical consequences of these issues. Specifically, Historical development of accounting theory and Criteria for choices among income-determination and asset-valuation rules in context of public reporting.

**Main Objectives:**

The course draws on related fields of study, particularly economics and finance, to examine the efficient markets hypothesis and its implications for financial reporting. Applications of the present value model in accounting, agency theory and its implications for financial reporting, the accounting standard-setting process, and the economic consequences of accounting decisions are also discussed. The major objective of this course is to present a review and analysis of the theoretical foundations of corporate financial reporting.

On successful completion of this course students will be able to:

- Understand the place of accounting as an academic discipline within the social sciences.
- Understand the development of accounting thought from its origins to current practice, including contemporary financial accounting research.
- Use authoritative literature of accounting as a tool in making accounting policy decisions.
- Evaluate accounting policy alternatives with respect to the Conceptual Framework of the FASB, other accounting paradigms, and the point of view of the various accounting constituencies.
- Apply knowledge of accounting techniques, concepts, principles and theories to solve financial reporting problems.
- Apply a structured decision model to exercise judgement in the application of accounting standards.
- Work in teams to design and undertake a research project.

**Required Text Book:**

Schroeder, R., Clark, M. and Cathey, J. (2014), Financial Accounting Theory and Analysis: Text and Cases, 11th Edition. It is available at the book companion website: [www.wiley.com/college/schroeder](http://www.wiley.com/college/schroeder).
