COURSE DESCRIPTION

This course is designed to address food safety and hygienic practices. This course will introduce the students to the prospective of foodborne illnesses and food poisoning, including biological, chemical, and physical hazards that could be contracted via food. Also, it will focus on the vehicles, processes and food handling practices that could lead to a foodborne illness. It will cover some topics related to the role of food processing, handling, packaging, and storage on food wholesomeness. Part of this course will concentrate on the foodborne diseases that affect populations at high risk. Moreover, the principles of hazard analysis critical control point (HACCP) system and its importance in reducing the prevalence of food borne poisoning will also be demonstrated. Food safety concerns in large-scale and small-scale food production areas will be discussed.

DELIVERY METHODS

The course will be delivered through a combination of active learning strategies. These will include:

- PowerPoint lectures and active classroom based discussion
- Collaborative learning through small groups acting in an interdisciplinary context.
- Tutorial sessions through engaging students in learning activities including analyzing results in the published articles or engaging in technical skills development.
- Seminars by students who will take a leading role in the delivering a presentation, presenting a paper or discussing an idea.

limit of 15% will receive a failing grade regardless of their performance. It is a student's responsibility to monitor the frequency of their own absences.

In exceptional cases, the student, with the instructor's prior permission, could be exempted from attending a class provided that the number of such occasions does not exceed the limit allowed by the University. The instructor will determine the acceptability of an absence for being absent. A student who misses more than 25% of classes and has a valid excuse for being absent will be allowed to withdraw from the course.

- Submitting a term paper on time is a key part of the assessment process. Students who fail to submit their work by the deadline specified will automatically receive a 10% penalty.
 Assignments handed in more than 24 hours late will receive a further 10% penalty. Each subsequent 24 hours will result in a further 10% penalty.
- In cases where a student misses an assessment on account of a medical reason or with prior permission; in line with University regulations an incomplete grade for the specific assessment will be awarded and an alternative assessment or extension can be arranged.
